## Dear Educator,

### Supporting You.

As educators, we know this is an especially challenging time as you navigate through new models of teaching and learning.

If you need ideas to transition between virtual and in-person instruction or to make your virtual classrooms more interactive, see pages 18 and 28 to learn about Davis Cares and our Distance Learning Hub for Undergraduate Nursing. These free, online resource-rich centers make it easier for you to create student experiences that promote successful learning in any environment.

### Engaging students. Empowering educators.

Please take a moment to review our 2021-2022 catalog. Our titles span the RN curriculum and reflect our commitment to listen and respond with the resources and support you need to ensure outstanding outcomes for your students in class and clinical.

### Making learning and teaching personal.

Our goal is to help your students master the knowledge they need to take them to the next level...and the teaching tools you need to make sure they succeed. We have innovative solutions that integrate print with today's best technology to create learning experiences personalized to meet the needs of your students, while providing you with the tools and resources you need to create active classrooms and engaged learners.

### Preparing for Next Gen NCLEX®.

Are you ready for the Next Gen NCLEX? Clinical Judgment, the brand-new component of Davis Advantage, develops the critical-thinking and clinical-reasoning skills students need to build the clinical judgment skills integral to safe and effective nursing care while preparing them for the Next Generation NCLEX. See pages 4-5 to learn more about how Clinical Judgment progresses across the curriculum.

### Building the future.

We thank you for your commitment to training the next generation of nurses and leading the charge to improve the quality of health care for all of us. We share your dedication to the advancement of nursing knowledge and the education of nurses, and recognize the challenging, yet rewarding path nurses have embarked on and the very special nature of those who have chosen it. You are today's heroes. The students you are teaching today will be the heroes of tomorrow.

If we can assist in any way, please call on us.

## Davis Advantage Across the Curriculum

Across a Learn-Apply-Assess continuum, Davis Advantage engages students and helps them make the connections to key topics. Whether you're teaching in-person or online, this complete, integrated solution aligns seamlessly with its textbook and equips you with actionable analytics to track students' progress, remediate where needed, and facilitate an active learning environment.

### Drive student success throughout their nursing education

- Build a strong foundation by introducing the platform in Fundamentals to teach students how to 'think like a nurse'.
- Create a consistent learning experience for students across the curriculum.
- Prepare students for the Next Gen NCLEX® with cases that develop clinical judgment skills through exploratory learning.

## LEARN

The foundation of the Davis Advantage platform, **Personalized Learning** immerses students in an online learning experience tailored to their needs. Students are assessed on their comprehension of key topics from the text, and then are guided through mini-lecture videos and dynamic activities to reinforce learning and bring concepts to life.

Animated mini-lecture **videos** connect with all learning styles to make must-know concepts more relatable and easier to understand.

The **Student Dashboard** provides quick snapshots of performance, time spent, participation, and strengths and weaknesses at a glance.

# ASSESS

**Quizzing** uses NCLEX®-style questions for assessment and remediation. Its adaptive, question-based format provides the additional practice students need to test their knowledge, master course content, and perform well on course and board exams.

Question 1 of 10

The nurse is evaluating the effectiveness of a small volume nebulizer bronchodilator treatment for a patient with emphysema. Which assessment change indicates an effective outcome of the therapy? Select all that apply.

- Pulse oximetry reading goes from 92% to 94%.
- Audible wheezes are diminished.
- Heart rate increases from 98 to 110 beats per minute.
- The client states "my breathing is the same."
- Facial complexion is a ruddier color.

**Feedback**

You answered 9 out of 10 correctly. Review the questions, answers and rationales below.

**Question 1**

The nurse is evaluating the effectiveness of a small volume nebulizer bronchodilator treatment for a patient with emphysema. Which assessment change indicates an effective outcome of the therapy? Select all that apply.

- Pulse oximetry reading goes from 92% to 94%.  
Rationale: An increase in the pulse oximetry indicates increased oxygenation.
- Audible wheezes are diminished.  
Rationale: Wheezes are a sign of restrictive airway, so a decrease is an encouraging sign.
- Complete blood count  
Rationale: Absence of menses could be due to menopause, pregnancy, or other causes. It should be diagnosed by performing a complete blood count.
- Follicle stimulating hormone (FSH) test  
Rationale: An FSH test does not give proper results as the FSH levels vary in postmenopausal and menopausal women.
- Thyroid stimulating hormone (TSH) test  
Rationale: A TSH test should be performed in the client to confirm the absence of menses, as it could also be due to thyroid related problems.

**Test-Taking Tip** Consider each answer option and "true" or "false."

Question ID: ADE-31546  
Course Topic: Lower Airway Disorder: COPD  
Concept: Oxygenation; Critical Thinking  
Cognitive: Analysis (Analyzing)  
Difficulty Level: Easy  
Client Need: Physiological Integrity  
Chapter: 28. Coordinating Care For Patients With Lower Airway Disorders  
Page Reference: 26-10

**High-quality questions**, including more difficult question types like **select-all-that-apply**, challenge students to think at higher cognitive levels.

**Comprehensive rationales** provide students with immediate feedback for on-the-spot remediation that explains why their responses are correct or incorrect. Page-specific references direct them to relevant content in their text, while **Test-Taking Tips** improve exam skills.

**Davis Advantage for Fundamentals of Nursing** is a complete, integrated solution that combines the power of a two-volume, student-focused textbook with an interactive personalized learning, clinical judgment, and quizzing experience to ensure student success in class, clinical and practice.

#### TEXTBOOK

The 4th Edition of *Fundamentals of Nursing* continues in its groundbreaking, two-volume format that teaches students to ‘think like a nurse’ from the very first day. Perfect for both concept-based and traditional curricula, it is the only text designed the way nursing fundamentals is actually taught. Volume 1 covers the theoretical knowledge taught in class, and Volume 2 covers the practical knowledge taught in lab.

- Promotes critical thinking, clinical reasoning, and clinical decision-making through a comprehensive approach to care across a full-spectrum nursing model of Thinking-Doing-Caring.
- Prepares students for the real world of patient care with case studies and clinically based exercises to develop clinical judgment skills and reinforce the thinking, doing, and caring they will do as nurses.
- Emphasizes the important aspects of safe and effective care to ensure better patient outcomes and build students’ confidence.
- Guides students through over 230 illustrated, step-by-step procedures with detailed rationales that offer the practice students need to master new skills.
- Speaks directly to students in an engaging, conversational style.

#### DAVIS ADVANTAGE

Using a unique and proven approach across a Learn-Apply-Assess continuum, **Davis Advantage** engages students and helps them make the connections to key topics. Whether teaching in-person or online, this innovative solution aligns seamlessly with the textbook and equips instructors with actionable analytics to track students’ progress, remediate where needed, and facilitate an active learning environment.

Thinking, Doing, and Caring, 3rd Edition

Leslie S. Treas, PhD, RN, CPNP-PC, NNP-BC

Karen L. Barnett, DNP, RN

Mable H. Smith, PhD, JD, MN, NEA-BC

**Davis Advantage for Basic Nursing** is a complete, integrated solution that combines the power of a single-volume, student-focused textbook with an interactive personalized learning, clinical judgment, and quizzing experience to ensure student success in class, clinical and practice.

#### TEXTBOOK

A comprehensive approach to care promotes critical thinking and clinical judgment to teach students how to ‘think like a nurse’ from the very first day. A consistent and concise organization along with a wealth of pedagogical features emphasizes the Thinking, Doing, and Caring at the heart of professional practice.

In every chapter, students first explore the theoretical knowledge behind key Fundamentals concepts. Then, they’ll learn the practical knowledge guided by the nursing process; and finally, learn the skills and procedures for safe and effective nursing care.

- **NEW!** Increased focus on Clinical Judgment reflecting the NCSBN Clinical Judgment Measurement Model (CJMM) and the relationships among the nursing process, critical thinking, clinical reasoning and clinical judgment.
- **NEW!** “Critical Thinking and Clinical Judgment” case study with questions added to each chapter
- **UPDATED!** Example “Client Conditions” to reflect the CJMM
- **UPDATED!** Nursing Process chapters combined into a single chapter to better reflect the interconnectedness of each step in the Nursing Process
- **ENHANCED!** Focus on patient advocacy

## Davis's Nursing Skills Videos

Judith M. Wilkinson, PhD, ARNP | Leslie S. Treas, PhD, RN, CPNP-PC, NNP-BC  
Karen L. Barnett, DNP, RN | Mable H. Smith, PhD, JD, MN, NEA-BC

### Essential nursing skills demonstrated step-by-step

Davis's Nursing Skills Video collection features more than 140 videos that follow the written step-by-step procedures presented in *Basic Nursing* and *Fundamentals of Nursing*. Each video teaches students how to perform key nursing skills safely and correctly, while a narrator explains clearly what to do. "What If..." situations in select videos discuss how to handle special circumstances that could arise when performing a procedure.

### Ensure safe, effective patient care

Use the power of your Learning Management system with a Skills Video Test Bank that lets you create quizzes to test students' comprehension of the skills and verify they have watched the videos.

### Stay current with best practices

The full collection of videos is reviewed annually for accuracy and updated to align with new research and current standards of practice.

Provide experience in  
key specialties.

51 structured case studies simulate the wide range of patient care challenges students will encounter in practice. These scenarios help them to develop the critical assessment, clinical-reasoning, and nursing skills they need to deliver safe and competent care—in a controlled, risk-free environment.

Each realistic, patient-care simulation focuses on a defined clinical domain, critical knowledge and skills, levels of competency, evidence-based practice guidelines, National Patient Safety Goals, and research-based design characteristics.

- Integrates standards of practice, including provider orders, evidence-based practice guidelines, general nursing practice, and references as well as preferred INACSL nomenclature
- Encompasses the full spectrum of clinical nursing practice domains, patient age levels, and cultural backgrounds at every level of health care—primary, acute, long-term, and palliative care
- Examines important topics in adult, pediatric, maternity, geriatric, emergency mental-health, and community nursing as well as nursing assessment and nursing fundamentals
- Bases scenarios on real-life patient care situations with decision points prompting students for an assessment, a response, and an action

## Lutz's Nutrition and Diet Therapy, 7th Edition

Erin E. Mazur, MSN, RN, FNP-BC  
Nancy A. Litch, MS, RDN

### The perfect combination of nursing and nutrition!

Prepare your students to meet the ever-changing demands of providing quality nutritional care for patients across the lifespan. This popular text, developed jointly by a nurse and a dietitian, provides a strong foundation in the science of nutrition and a clear understanding of how to apply that knowledge in practice—*from a nursing perspective*.

- The latest nutritional guidelines and information, including Dietary Guidelines for Americans 2015-2020 and the emphasis on “eating patterns” regardless of cultural background, the Institute of Medicine’s new recommendations for school meals, references to government websites that reflect current recommendations and government programs that encourage healthy eating, new food allergy guidelines, and updated recommendations and food plans for weight control, clients with diabetes, HIV/AIDS, dysphasia, preventing heart disease, and other health concerns
- More alternate-format NCLEX-RN®-style questions
- Cautions for unregulated supplements and descriptions of interactions of food, drug, and over-the-counter nutrients
- Life cycle approach that includes screening tools and nutritional interventions for infants, children, adolescents, and mature adults, as well as pregnant and lactating women
- Assessment tools and tables, including Food Handling Guidelines, Labeling Regulations, Research Summaries, and Wellness Tips

### Dosage Calc 360°

Sandra Luz Martinez de Castillo, RN, MA, EdD | Maryanne Werner-McCullough, RN, MS, MNP

#### Learn. Practice. Assess.

**Dosage Calc 360°** is the complete online program that guides students through learning, practicing, and assessing the knowledge they need to calculate drug dosages safely and accurately. It works with students every step of the way to conquer their fears, build confidence, and provide the experience they need to be successful.

#### The key to mastering dosage calc is to practice, practice, practice.

Designed to do what the best instructors do in class, **Dosage Calc 360°** organizes this often-intimidating content into easy to master modules. Videos and interactive graphics enhance understanding. Students practice their new skills and continuously assess their strengths and weaknesses to identify the areas where they should focus their study time. Both instructors and students can easily track student performance.

- **Learn** delivers must-know content in student-friendly modules...
  - Illustrated, in-depth readings and interactive graphics meet the needs of multiple learning styles.
  - Narrated, full-color videos demonstrate problem set up and execution step by step.
  - Interactive graphics combine clickable art and content to engage students.
- **Practice** gives students the experience they need to master the content...
  - Exercises and NCLEX®-style practice questions build calculation skills and reinforce learning, including fill-in-the-blank, multiple-choice, hot spot, ordered response, and select-all-that-apply (SATA) questions as well as syringe-pull exercises.
  - Color coding of the four dosage calculation methods lets students quickly identify the method that works best for them.
  - Detailed rationales and examples for all practice problems make concepts clear.
- **Assess** lets students and instructors easily track performance...
  - An assessment at the end of each module tests students' comprehension and synthesis of the content across the topics.
  - Students' strengths and weaknesses are continuously monitored and identified.
  - Students can return to review any module for additional practice and exam prep.

#### Take a data-driven path to student success.

- Class management tools make it easy to set up your classes.
- Easy-to-use dashboards display participation and average time spent in the program as well as scores on module reviews and tests, by student and by class.
- Real-time analytics identify areas in which students are struggling to enable you to intervene quickly.

#### Ensure patient safety and prevent medication errors.

Help your students conquer their fears and understand the most common math concepts used in nursing practice today. Color-coded, step-by-step guidance shows students how to accurately calculate drug dosages using all four methods. They begin with a basic math assessment and then explore in-depth coverage of complex topics, including intake and output, parenteral intake, NG tube feeding strength, and labeling IVs.

- **New!** Up-to-date drug labels for reference and skills testing
- **New!** Content on weight-based dosing for IV heparin administration and a new formula for calculating pediatric fluid replacement
- **Expanded!** More scenarios added to enhance critical-thinking and clinical judgment skills, including multidisciplinary communication and common errors with each type of calculation.
- Coverage of all major methods—linear ratio and proportion
  - fractional ratio and proportion
  - dimensional analysis
  - the formula method
- Detailed photographs and illustrations with precise descriptions on how to analyze equipment and understand medication labels

## Dimensional Analysis

Calculating Dosages Safely,  
2nd Edition

Tracy Horntvedt, RN, MSN, BA

**Make dosage calculations easier to master.**

Teach your students a method of problem solving that organizes data in a manner that is easy to understand and apply. They'll learn how to calculate both

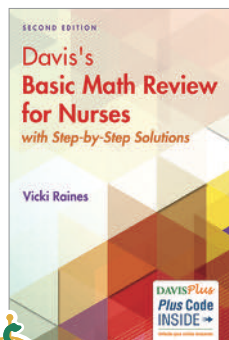

simple and complex medication dosage problems with consistency and accuracy and reduce medication errors with simple safety mechanisms.

- Learning models, including the “4 Cs” approach to dosage calculations: compute, convert, conceptualize, and critically evaluate
- Over 1,000 practice problems, including basic skills pre-test, end-of-section practice tests in each chapter, end-of-unit assessment tests, and end-of-book post-test
- “Speed Challenge” chapter quizzes
- Real-life scenarios that illustrate how to apply concepts to practice
- “Note” and “Alert” boxes that highlight potential safety issues
- A glossary of key terms at the beginning of each chapter

**From simple to complex math...one step at a time.**

Step by step, problem by problem, students will build confidence and overcome their anxieties to successfully use fractions, decimals, percentages, ratios, proportions, positive and negative numbers, household measurements, and the metric system.

- Step 1.** A pretest in each chapter determines where they should focus their time.
- Step 2.** Practice problems, explanations and specific examples show them exactly what to do.
- Step 3.** End-of-chapter tests check their understanding of the material.
- Step 4.** Four comprehensive practice tests assess their know-how.
- Step 5.** Step-by-step solutions for all problems in the text show them how to correct their mistakes.

## Davis Advantage for Medical-Surgical Nursing, Thinking, Doing, and Caring, 2nd Edition

Janice J. Hoffman, PhD, RN, ANEF | Nancy J. Sullivan, DNP, RN

**Davis Advantage for Medical-Surgical Nursing** is a complete, integrated solution that combines the power of a student-focused textbook with an interactive personalized learning, clinical judgment, and quizzing experience to ensure student success in class, clinical and practice.

#### TEXTBOOK

The 2nd Edition of *Medical-Surgical Nursing* continues its groundbreaking approach—helping students make the connections between concepts and patient care by fostering an understanding of the relationships between the physiology, pathophysiology, clinical presentation, and management of disorders.

- Focuses on the diseases and disorders that nurses are most likely to encounter.
- Provides clear and well-defined nursing care guidance that easily identifies and reinforces what the nurse's responsibilities are as a member of an interprofessional care team.
- Presents Nursing Management consistently using the nursing process; prioritizes care according to the ABCs and Maslow's Hierarchy; and includes bulleted rationales to explain the 'hows' and 'whys' of treatment.
- Incorporates chapters dedicated to critical care, content important for new nurses.

#### DAVIS ADVANTAGE

Using a unique and proven approach across a Learn-Apply-Assess continuum, **Davis Advantage** engages students and helps them make the connections to key topics. Whether teaching in-person or online, this innovative solution aligns seamlessly with the textbook and equips instructors with actionable analytics to track students' progress, remediate where needed, and facilitate an active learning environment.

**NEW!** Clinical Judgment is now included in the Davis Advantage platform to elevate students' critical thinking and clinical reasoning, helping them to build the clinical judgment skills they need to practice safe and effective nursing care and to prepare for the Next Generation NCLEX® with confidence. *See pages 4-5 to learn more about Davis Advantage.*

## Davis Advantage for Pathophysiology

Introductory Concepts and Clinical Perspectives, 2nd Edition

Theresa Capriotti, DO, MSN, CRNP, RN

**Davis Advantage for Pathophysiology** is a complete, integrated solution that combines the power of a student-focused textbook with an interactive personalized learning, clinical judgment, and quizzing experience to ensure student success in class, clinical and practice.

### TEXTBOOK

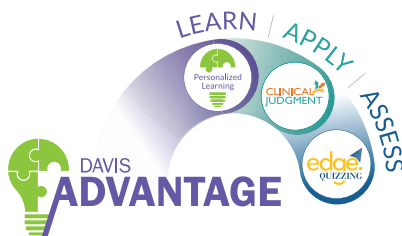

The text connects what students are learning to the real world in which they will practice... introducing them to the pathophysiologic processes of the conditions they'll encounter in clinical settings. Organized by body systems, each chapter helps students understand the relationships between the underlying pathophysiology and patient assessment data, laboratory findings, and diagnostic testing results. Real-world perspectives bridge the gap between the science of disease and clinical patient care.

- Full-color illustrations compare normal anatomy and physiology to pathophysiology.
- X-rays, CT scans, MRIs, ultrasound pictures, nuclear studies, ECGs, pathology samples, anatomical diagrams, tables, figures, and algorithms illustrate key concepts.
- “Making the Connections” boxes link symptoms, assessment finding, pathophysiologic mechanism, diagnostic test result, treatment, and nursing interventions.
- “Clinical Concept” boxes explain how key concepts apply to clinical practice.
- Flowcharts make it easy to follow pathophysiologic processes.
- Content on pathophysiologic mechanisms on a molecular level and genetic concepts in relevant disorders help students to understand common disease processes, diagnostic tests, and treatments based on altering cell mechanisms.

### DAVIS ADVANTAGE

Using a unique and proven approach across a Learn-Apply-Assess continuum, **Davis Advantage** engages students and helps them make the connections to key topics. Whether teaching in-person or online, this innovative solution aligns seamlessly with the textbook and equips instructors with actionable analytics to track students' progress, remediate where needed, and facilitate an active learning environment.

**NEW!** Clinical Judgment is now included in the Davis Advantage platform to elevate students' critical thinking and clinical reasoning, helping them to build the clinical judgment skills they need to practice safe and effective nursing care and to prepare for the Next Generation NCLEX® with confidence. *See pages 4-5 to learn more about Davis Advantage.*

*“Students who completed topics before class scored 16-24 points higher on assessments and every single student who completed all topics by the relevant test dates passed that test as well as the course as a whole!”*

—Jessica DelBove, PhD, Assistant Professor of Health Sciences, South University

PhD, FNP-BC, APRN, FAAN  
Theresa M. Valiga, EdD, RN,  
CNE, ANEF, FAAN

### Take an evidence-based approach.

Teach your students the skills they need to lead and succeed in the dynamic healthcare environments in which they will practice. From leadership and management theories through their application, they'll develop the core competencies needed to provide safe and effective nursing care to their patients.

### Prepares nurses to be leaders at all levels...

- **NEW, UPDATED & EXPANDED!** Content reflecting the evolution of nursing leadership and management
- **NEW!** Tables that highlight how the chapter content correlates with core competencies, including the **NEW** AACN Essentials Level One Core Sub-Competencies, ANA Code of Ethics, and Standards of Practice or Specialty Standards of Practice
- **NEW!** 10 NCLEX-style questions at the end of each chapter with rationales in an appendix
- **NEW & EXPANDED!** Coverage of reporting incidents, clinical reasoning and judgment, communication and judgment hierarchy, quality improvement tools, leveraging diversity, security plans and disaster management, health care and hospital- and unit-based finances, and professional socialization
- Covers quality care initiatives and core competencies, including those from the National Academy of Medicine (formerly the Institute of Medicine [IOM]), Quality and Safety Education for Nurses (QSEN), and the **NEW** American Association of Colleges of Nursing (AACN) Essentials, which form the foundation of the content
- The essentials of critical thinking, decision making and problem solving, including concepts such as SWOT, 2x2 matrix, root-cause analysis, plan-do-study-act, and failure mode and effects analysis
- Managing conflict, managing teams and personnel, change theory, and budgeting

## Nursing Theories and Nursing Practice, 5th Edition

Marlaine C. Smith, PhD, RN, AHN-BC, FAAN

**Introduce your students to theories that are the foundation of nursing today.**

For each theory, students find an introduction to the theorist, a description of the theory's role as a model for nursing practice, and an examination of its application in clinical practice to illuminate the interrelationship between nursing theories and nursing care.

- **New Chapters!** *Adeline Falk-Rafael's Theory of Critical Caring* and *Katie Eriksson's Theory of Caritative*
- Covers the middle range theories and practice models that define the best outcomes and link theory to clinical practice
- Chapters written by the original theorists, scholars, and nurses experienced in use of the theory in their practice
